### New Machine to Smash Atom Is Being Sought

BERKELEY, CALIF. — American and Russian scientists are working irdependently to build a new atom smasher which may create energy much greater than that of the atomic bomb, the University of California announced recently.

With the aid of the new machine, scientists hope to study the fundamental forces which hold matter together, the announcement said. The new atom smasher, it said, may produce energy equal to that of the cosmic rays.

Dr. Ernest O. Lawrence, Nobel prize winner, said the new machines, which have been christened synchotrons, are as important a development in atom-smashing as was the cyclotron.

The synchotron, scheduled for completion early next year, was invented by Dr. Edward M. McMillan, one of the co-discoverers of neptunium, element 93, used in the manufacture of the atomic bomb.

The synchotron will be three times as powerful as the betatron, the next largest atom smasher.

### Navy Bureau Conducting Test of High Explosives

WASHINGTON. — The navy said that the bureau of ordnance is conducting high explosive tests off San Jose island in the Perlas group.

The tests, which were not described in detail, will continue through June 30.

The island is about 50 miles from the Pacific entrance to the Panama canal.

### Allied Council Orders Purge of Nazi Books

BERLIN. — A purge of German fascist and militarist literature, criticized as "akin to the Nazi book burnings," has been ordered by the four-power Allied control council.

Destruction of Nazi and German military memorials of World Wars I and II also was directed by the council, in orders approved by its co-ordinating committee. Many have been razed.

## Ready For Flue-Cured Referendum

Lists of flue-cured tobacco growers who are eligible to vote in a referendum on July 12, 1946, to determine whether they want quotas on the 1947 crop are now being compiled by County Agricultural Conservation Committees and are open for inspection in the county office.

The referendum is called in connection with the law which provides for quotas in 1947 on flue-cured tobacco. However, quotas will not be in effect for 1947 unless approved by at least two-thirds of the growers voting in the referendum. Mr. W. T. Nash, chairman of the County Agricultural Conservation Committee, said that, "any person who has an interest in the 1946 crop of flue-cured tobacco as owner, tenant or share cropper is eligible to vote in the referendum being held July 12." No person, he added, is entitled to cast more than one vote even though he may be engaged in producing flue-cured tobacco in two or more communities, counties, or states.

At the present time, flue cured tobacco growers are producing above world consumption levels to build up depleted stocks in foreign countries. Marketing quotas afford an opportunity to adjust this supply to meet demand.

Marketing quotas furnish growers with a method of adjusting supply to demand and can help to provide fair prices to growers for the tobacco they produce.

As in the past, Mr. Nash pointed, growers will vote on three propositions: (1) do you favor marketing quotas for three years, 1947, 1948 and 1949; (2) do you favor the quota for one year, 1947, but oppose quotas for three years? or, (3) are you opposed to any quotas?

Every flue-cured grower in Appomattox County is urged to go to Chap Voting Precinct on July 12, between the hours of 8:00 A. M. and 6:00 P. M., and vote his or her opinion on the continuation of flue cured tobacco marketing quotas.

Thursday, July 11, at 10:30 A. M., the 551 acre Mountain View Dairy Farm of W. P. Ferrell will be sold at auction, together with valuable livestock and equipment.
